

MANAGING PASSWORDS & PINS

Passwords and PINs protect sensitive data and it's critical to keep them safe. Try these three best practices.

3 TIPS TO STAY SAFE:

TIP

MAKE YOUR PASSWORDS AND PINS UNIQUE

Password

Create a strong, unique password and PIN for every account and device. If one password or PIN is exposed, your other accounts and devices are safe.

TIP

KEEP YOUR CREDENTIALS SECRET

Don't write down passwords or PINs, and make sure not to share them. Shield your keyboard or keypad when logging in.

TIP

SAFELY STORE YOUR CREDENTIALS

Avoid saving passwords in your browser. Instead, consider a password manager to manage all those unique logins. (Check with your organization before using one at work.)
